Art Unit: 1625

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21 and 26 , drawn to morpholino substituted compounds.

Group II, claim(s) 5, 8 and 9 , drawn to pyridine substituted compounds.

Group III, claim(s) 1, drawn to a method of disrupting platelet aggregation and adhesion etc. by administering a selective PI 3-kinase beta inhibitor.

Group IV, claim(s) 2 drawn to a method of anti-thrombosis using a selective PI 3-kinase inhibitor in general except for a certain genus minus certain enumerated species.

Group V, claim(s) 3,6 and 7 drawn to a method of anti-thrombosis using a selective PI3-kinase inhibitor which is a morpholinyl substituted compound of formula (I.)

Group VI, claim(s) 4 and 19, drawn to a method of anti-thrombosis using a selective PI3-Kinase inhibitor which is a pyridinyl substituted compound of formula (III).

Claims 27-30 are not allowable because these pharmaceutical method claims recite a wide range of not enabled diseases. Thus they are not grouped in the restriction requirement.

Applicants should select a single enabled disease.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In the PCT case the first 2 claims were not examined. Thus there was a determination of disunity.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1625

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Dentz whose telephone number is 571-272-0683. The examiner can normally be reached on Mon-Fri from 8 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on 571 272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
